Premium Digital Printing Cast PU

ORAJET® 3971GRA+  
ProSlide

**ORAJET® 3971GRA+ ProSlide Premium Digital Printing Cast PU - the PVC-free alternative for vehicle wrapping**

The new polyurethane film is a glossy digital premium cast with the unique *RapidAir*® technology and the simplifying *ProSlide* technology.

With the *ProSlide* technology full vehicle wrapping is easy. The repositioning features are outstanding. The material can be stretched far more than conventional vehicle wrapping films without detaching. The smooth film sticks perfectly to the surface. Therefore the application even on curved surfaces is more easy.

The proven ORAFOL *RapidAir*® structure of the adhesive enables a bubble-free application and entrapped air can be removed by simply smoothing it out under the film.

**Product benefits:**

- Premium cast polyurethane film
- White with glossy surface
- *ProSlide* technology for extra easy repositioning
- *RapidAir*® technology for an easy application even onto 3D-surfaces
- For long-term outdoor applications e.g. full wraps onto vehicles
- Inkjet printing with solvent based or (UV-) or latex inks

**Recommended laminating films:**

- ORAGUARD® 279G/SG – also polyurethane

**Engineered to Achieve Perfection™**
