Printability		Suited for digital printing / screen printing
Application		Promotional and decorative applications, Packaging, Single use, short term, small to medium sized applications.

Ask for our custom sized panel service

Board size can be changed from 500m² off within thickness 10mm, 16mm and 25mm. The leadtime for production is the same as for standard non-stock items.

There are **no extra costs involved**, if only the length of the boards changes. This means that the same price/m² is valid as for the standard sizes.

In width, we always start from 1200mm or 1600mm. If the custom size is an equal divisor of the standard width, no extra costs are involved. In any case, the total width of either 1200mm or 1600mm should be taken into account.

Test 's Condition : 22°C and 50% humidity
