## AbbeyScreen Data Sheet

### 190DP/150D EE (V2 Issue date: January 2026)

## AbbeyScreen

Data sheet: Order grade: 190DP/150D (EE)

Material content: Recycled content 71.4%/Virgin content 28.6%

# AbbeyScreen

## Technical details

**Material Calliper: 2730 microns**

**Weight: 616g (+/- 5%)**

**ECT: 7.83 (Kn/M)**

**Burst: 1235 (Kpa)**

**Recycled content 70%**

Fluting & centre/liner and WTTL; made from 100% waste-based (recycled) material. Other heavier enhanced flutes are available as optional extra depending upon the performance requirements of the material. *(Note: As Fluting weights increase then so does the rigidity of the flute tips that can have an influence on the print & conversion results depending upon the process used).*

Material surface suited for Digital, Screen and offset litho inks

MOQ: 1000m<sup>2</sup>

Other Flute profiles available in this grade: EB / NE / B / E / F / N

Material is completely 100% recyclable in accordance with EN13430 as an unprinted grade

Corrugated materials working to a circular Economy using resources time and time again
