ORAJET® 3951RA+ ProSlide Premium Digital Printing Cast PVC

Outstanding repositioning with the new ProSlide technology

Time is money – also within the community of car wrappers. The faster and easier you can achieve your high quality wrapping, the better. With this in mind, ORAFOL has introduced a brand new adhesive technology which makes film repositioning easier than ever before. ProSlide is the name, and it is a name that is here to stay. It is a special slidable adhesive technology, which enables a quicker and easier high performance reliable installation.

ORAJET® 3951RA+ ProSlide is an ultra glossy digital printing film with superb printability and outstanding image quality, and come also with the unique *RapidAir®* system. And of course the film features the superb new ProSlide technology. Truly Engineered to Perform Better.

Product benefits include:

- **ProSlide** technology for even easier repositioning
- Premium cast white PVC film for digital printing
- Glossy surface
- *RapidAir®* technology for easy and hassle free application
- For long term applications as full wraps onto vehicles
- Inkjet printing with solvent based inks or UV- or Latex inks

Recommended Laminating Film:

- ORAGUARD® 293/293F, 290/290F
