

Wassertop HS 2.46-H

(N°. : 07417999)

- **USE:** Fountain solution additive concentrate for Heatset printing.
For Water with a hardness >15 °dH.
- **PROPERTIES** Strong buffer system keeps the pH value on a stable and ideal level for printing. Rollers don't get water-friendly. Optimal surface tension, quick and clean start on the machine, free run of the plates. No emulsifying of ink. Prevents corrosion of plate, blanket and back pressure cylinders.
- **INSTRUCTIONS** Suitable for heatset printing machine with an alcohol dampening system (significant reduction of alcohol to 5 Vol.% IPA).
Recommended amount to add: 3 -4% per liter.
- **SECURITY** The product is classified and marked according to EC-Directive 1999/45/EEC.
Suitable only for commercial purposes!
- **PACKAGING** 20 kg container (refund)
220 kg barrel (refund)
600 kg container (refund)
1000 kg container (refund)
- **FURTHER INFORMATION** Further information can be obtain by reading the safety data sheet and the product label. Certified for manroland-Heatset.
Protect from frost!
